

New Papago! GPS with Bluetooth Support

15 December 2009 , The Star InTech

PETALING JAYA: Papago! has a new GPS and it comes with a 5in wide touchscreen as well as Bluetooth support to enable users to pair it with their mobile phone for handsfree calls while driving.

The R5890 also features the latest M3GPS X5 SE software, which comes with maps of five Asian countries – Malaysia, Singapore, Thailand, Indonesia and Brunei.

The GPS is powered by the latest SiRF IV 500MHz processor and comes equipped with the iFly menu interface (similar to the iPhone) and multimedia playback functions.

It has 2GB of internal memory, which can be further expanded via the built-in SD card slot.

Just like its predecessors, the R5890 offers standard features like 3D Buildings, Junction Views, Lane Assists and a substantial library of Point of Interests (POIs) with improved voice instructions and navigational prompts.

The R5890 has a recommended retail price of RM949.
